

Android Class

#Android Notes

WebView In Android

WebView

- WebView is a view that display web pages inside your application.
- WebView makes turns your application to a web application.

Steps

- Create new project.
- Add Webview inside your activity_main.xml.(Design as per your requirement)
- In MainActivity.java create object of webview and initialize it.
- Now inside onClick() method of button take one string variable that store content of EditText.
- Now use **getSettings()** method of webview.
- Use **setJavaScriptEnabled()** method along with getSettings() method to enable JavaScript in the WebView.

webView.getSettings().setJavaScriptEnabled(true);

Cont...

- Now Create class **MyWebViewClient** that extends **WebViewClient**.
- Override **shouldOverrideUrlLoading()** method of **WebViewClient**.
- Now use **setWebViewClient()** method of **Webview** to initialize **MyWebViewClient** class object .
- Use **loadUrl()** method to load url inside **WebView**.
- Add **internet** permission in **Manifest** file.

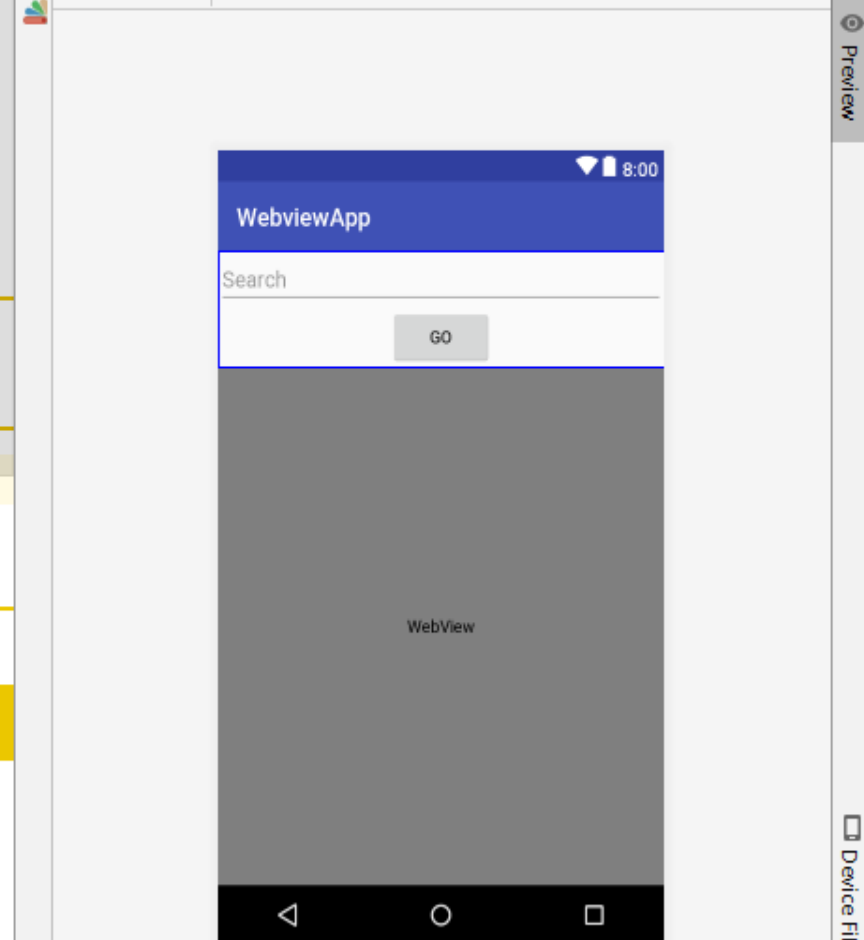

What is WebViewClient ?

- If you click on any link inside the webpage of the WebView, that page will not be loaded inside your WebView.
- In order to do that you need to extend your class from **WebViewClient** and override its method.

```
1 <?xml version="1.0" encoding="utf-8" ?>
2 <LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
3     xmlns:app="http://schemas.android.com/apk/res-auto"
4     xmlns:tools="http://schemas.android.com/tools"
5     android:layout_width="match_parent"
6     android:layout_height="match_parent"
7     android:orientation="vertical"
8     tools:context=".MainActivity">
9
10    <LinearLayout
11        android:layout_width="match_parent"
12        android:layout_height="wrap_content"
13        android:orientation="vertical">
14
15        <EditText
16            android:id="@+id/etSearch"
17            android:layout_width="match_parent"
18            android:layout_height="wrap_content"
19
20            android:hint="Search" />
21
```

```
16         android:id="@+id/etSearch"
17         android:layout_width="match_parent"
18         android:layout_height="wrap_content"
19
20         android:hint="Search" />
21
22     <Button
23         android:id="@+id/btnGo"
24         android:layout_width="wrap_content"
25         android:layout_height="wrap_content"
26         android:layout_gravity="center"
27         android:text="Go" />
28 </LinearLayout>
29
30 <WebView
31     android:id="@+id/webView"
32     android:layout_width="match_parent"
33     android:layout_height="match_parent"></WebView>
34
35 </LinearLayout>
```
